Automated exam and audit findings management

Is your organization managing exam and audit findings with endless spreadsheets, documents, and emails? Nfindings software provides a more streamlined, effective findings management process so you can create organization-wide efficiencies to solve problems well before exam time.

With **Nfindings**, your organization can:

Access and manage findings

Our centralized platform makes it easy to access and manage findings from internal, external, and regulatory audits in real time, so you have what you need, right when you need it.

Analyze and report findings

With extensive reporting capabilities, your team can identify and evaluate exam and audit findings to take the appropriate steps for exam readiness and overall compliance.

Automate and evaluate action

Your team can assign tasks to each finding, direct the best course of action, and monitor the work being done. Automated reminders and notifications help to expedite and accelerate workflow.

Key Features

- Ability to import findings from Excel
- Setup and conversion of existing findings
- Role-based access for findings and task owners
- Automated task reminders and notifications
- Audit trail for tracking all changes
- Custom reporting

- Unlimited users and data storage
- Unlimited training and customer support
- Access to product user groups
- Automatic software security updates and enhancements
- Ask The Expert feature
- Integration with Nverify to link the auditing and findings processes

Get automated for appropriate action and resolution of your audit and exam findings.
