

Seamless loan submissions

Loan submission is the last step in a long, complex process. If it's not done exactly right, then everything grinds to a halt, costing your organization time and money. Ntransmittal allows you to identify potential data errors and correct them prior to submission.

With **Ntransmittal**, you can:

- **Review** data to ensure it is complete and in compliance with HMDA Plus requirements.
- **Resolve** errors and omissions so you can confirm loan qualification before it goes into submission.
- **Format** the applications in accordance with form regulation requirements, for an easier import into the appropriate platform.
- **Submit** the clean loan application after your review, for a smooth, streamlined process.

Key Features

- Works with all core processors
- Easy-to-use reports
- Data formatting and review
- Downloadable transmittal file
- Unlimited support

Holistic lending compliance

Need to go back a step? Ntransmittal integrates with other software in our lending compliance suite, for holistic lending compliance that enables your financial institution or financial services company to experience the upside of risk.
